May man keep a watchful eye
that these crimes against humanity
will never reoccur again.

These crimes, the worst in the history of mankind, are being revived in their beginnings.

The CIA is operating labor camps of sadism and sodomy, mass drugging tens of thousands of its citizens a year and whenever it can worldwide.

The CIA is operating gas chambers, spraying thousands of people a year with concentrated nerve gas. Germany has been turned into a country of CIA gas chambers.

The CIA aims at the destruction of man's holy image before the Lord.

These crimes are supported actively by the Kanzler of Germany, Helmut Kohl, and the BND, especially through poison pellet operations.

The laboratories of the CIA are developing new drugs in the intent of specific dysfunction of individual systems of the human body, applying advanced bio-technologies to create new, devastating dangers to human health.

These crimes could be publicized in a heat beat.
They continue in public silence.

The cynicism of our times is detestable to the Lord.
