1) US Global Hegemonic Policies

1a) War Objectives from 1939 - 1945

The political-military efforts of the Allied Forces during WW II were concentrated on their war objectives: unconditional surrender of the fascistic Achsenmächte and Japan, border revisions, division of Germany, administration by an Allied Control Council, demilitarization, denazification, democratization and reparations. (Teheran Conference 28. 11. - 01. 12. 1943; Jalta Conference 04. - 11. 02. 1945; Potsdam Conference 17. 07. - 02. 08. 1945)

Military actions were e.g. cranked up armament research and production, securing of supply lines, invasion of Western Europe and a war on multiple fronts.

1b) Nuernberg Trials

1b1) The political-military opponents were fascist governments, which pursued total warfare with propaganda, racist ideology, militarism, non-recognition of international conventions, labor/concentration camps, mass murder and genocide.

1b2) The trials (1945-47) gave impulses to international law, addressing the Geneva Conventions, genocide, war crimes, limitations, human rights and establishing the Nuernberg Principles and Code.

1c) From imperial to hegemonic policies

With the surrender of the Achsenmächte on May 8th and Japan on September 2nd 1945 the USA and Russia advanced to superpowers of a new world order over war and peace in possession of atomic weapons, the US in 1945, the USSR in 1947. They extended the imperial policies of the 19th into the 20th century for profit and control of global power structures and extended their war objectives beyond the capitulation of the fascists towards political-ideological block formation with satellite states, new borders and spheres of influence, free access to resources, advantageous terms of trade and division of labor. WW II led without a peace treaty in a poisoned atmosphere to the Cold War up to 1989. The NATO was founded on 04. 04. 1949 and the Warsaw Pact on 05. 05. 1955.

The US leadership transformed the political-social character of their country corruptively along secret policy goals into a militant nationalistic state, envisioning a stable, enduring, prosperous global Pax Americana, while formally adhering to a constitutional democracy, human rights and freedoms.

1d) Cold War

The US accepted the challenge of the USSR for first place and started was a race in ideology, propaganda, block formation, arms, space, geo-political-social structures, resources, sciences, technologies, applications, trade, corruption and fornication. Cold War objectives of propaganda and military battlefields spread beyond religion and culture to all fields to dominate especially the information technologies and life sciences with anthropology, psychology, sociology, medicine, biology, zoology, biochemistry, electro-biology, genetics and also ecology and climate. All professional and non-professional fields were opened up to hegemonic competition and all means allowed except direct employment of A-weapons.

Backbones remain worldwide military presence, massive use of force doctrine, credible deterrence with overkill ABC weapons and aggressive security R&D programs with technological superiority.

1e) Driving forces

Driving forces are the political-military-intelligence-scientific-industrial power elites, their institutions, foundations and think tanks, in first line the Office of the President, USSS, DoD, JCS, DIA, DoJ, CIA, NSA, FBI, DHS, Majority and Minority Leaders of Congress and the Supreme Court.

Decision making organ of the Security Community is the National Security Council, established in the National Security Act of 1947 with the CIA, drawing out global power lines for home based predominance in all military fields with foreign sided dependencies and also secret policy goals to cover all civilian domains, e.g. worldwide control over larger R&D programs, surveillance of the total information flow, point censorship of all media, social programming of political, religious, economic, financial, social structures and processes, manipulation of individual psychological profiles and beyond of demographic structures of entire populations.

They are authorized by executive order hypocritically under the label 'security', though they realize a clandestine revolution in violation against the consent of the governed, constitutional standards and international conventions: Looming charges against the responsible parties of this despotic perversion are e.g. massive human rights violations, seditious conspiracy and treason.

1f) Enforcement concepts

Secret policy operations realize cold war objectives in all fields of a nation's life as well as in the satellite states and are carried by corruption over to the clients of politically opposite camps.

1e1) Security planning receives priority over national, general public interests with support by public relation campaigns to justify the security apparatus and over international, general public interests of the Community of Nations in continuous, collaborative co-ordination of interests with a supportive diplomatic network of e.g. transatlantic and -pacific partnerships.

1f2) Shielded from public scrutiny are most political transactions, while intelligence operations proceed in total secrecy and unaccountably, their agendas being in goals, execution and cover closely interwoven.

1f3) The press shapes the public social reality and its rooms of political-social-cultural movement with its facades, public issues, discussions and opinions. As facades serve friable curtains like a constitutional framework, old fashioned etiquettes, political correctness, illusions and misinformation.

The political representatives are promoted as leaders of progress with growing wealth and welfare.

W. Colby, CIA director (1973-76), stated 'The CIA controls everyone of significance in the major media', where it spent about 30% of its budget on covered press personnel and programs.

1f4) The apparently natural, calm political-social surface is kept clean by the security services. Their directives demand not mobilization, but a manipulable, stable, public environment of opinions and actions with only security goals supporting, conform, illusions guided, non-questioning, non-probing populations.

1f5) The traditional goals of the military to successfully invade a foreign country and of the intelligence services to topple it without outer force by corruption in collapse from within have been superseded.

The CIA/MI5 coups 1953 in Iran against Mohammad Mossaddegh, reinstalling the Shah and 1963 in Iraq against Abd al-Karim Qasim in support of the Ba'ath Party were deemed operations without alternative.

1f6) A gapless early warning system is to spot security threats against essential assets: personnel, policy goals, operations, methods, installations, equipment and data banks. Also, the image of the welfare state is to be shielded and the pathological character of undercover operations to be suppressed.

A global surveillance/communication system with satellites, ground receiver stations with high speed-capacity computers, interception of data high ways and wiring up of entire populations with microchips records the information flow in its entirety. Space derived and intercepted data are collected mostly by the DoD, CIA, FBI, DHS and NSA.

1f7) Corrupted or neutralized are watchdogs, whistleblowers and critics of system and security.

Suppressed is any arising attempt towards publication of a victim's medical and legal evidence.

Hit teams within the global surveillance system pump them up with depot poison pellets for death.

Populations are pumped up to achieve individual-social programming of political-social behavior.

1f8) Technologies are seen as the 'key to power' in the 21st century.

They are the practical tools of the operational arms. US/NATO research panels of the military and security agencies like the Defence Advanced Research Projects (DARP) develop the arsenal of compact weapon architectures over the spectrum of conflicts out of an array of large scale research, development, test and employment programs, which are offered, awarded, tested, set up for operation, departmentalized and institutionalized. Weaponizing of modern technologies is to hit progressively easier, faster, severer and more precise than foregone ones and to exhaust human-material, scientific-technological capabilities in space, air, at sea, land from single to large scale, non-lethal to lethal, intercepting to blocking to retaliating tools, mainly in misuses of physics, chemistry, biology, genetics, medicine and computer science. They corrupt as totalitarian tools in first line human living environments, where it cannot be perceived by the senses in the very small, very distant and difficult to detect.

About 40% of the US military budget with total secrecy goes into more than 50 000 black projects of research, testing and employment with command centers and a system of labor camps. Developed are B-C-R-G micro-weapons as the 4th generation of weapons after spears, guns, rockets, now armed with toxins like contaminants, bio-chemical-genetic agents, electrical current, electro-magnetic-thermal-acoustic wave-particle radiation and neurologically coded misinformation.

1f9) The UN Outer Space Treaty from 1967 bans the placing of weapons of mass destruction in outer space as a basis for international space law. It is ratified by the major powers and 107 countries are full party to the treaty.

2) US/Client B-C-R-G weapon development from 1945 on

2a) Projects

The US CIA, concurring with US Military, NATO and private research centers, investigates from its formation on in bio-chemical laboratories systematically poisons for their incisive effects on the human body, utilizing man's vulnerability to traces of natural and synthesized bacteria, viruses and toxins. They draw on research in Europe from before WWI, in Japan before WWII and also on exotic plants and animals, voodoo rites and pseudo-medical experiments in Nazi concentration camps. They recruited in Operation Paperclip, authorized by the Joint Chiefs of Staff, from 1947 - 1953 about 9000 former Nazi intelligence officers, scientists, technicians and doctors for their technical teams, considered war booty, most notably known Werner von Braun.

They scaled up their R&D efforts rapidly in the 50s, in goal depraved and outlawed and synthesized new classes of toxins to manipulate every psychological, physiological and genetic function of humans, animals and plants. Radiation weapon systems are developed in their physical-bio-chem labs, retrieving studies from before WWII to manipulate climate, equipment, individuals, groups, populations and the level of a physiological function. Developed is an arsenal of compact, non-conventional, non-lethal to lethal electro-magnetic-bio-chem-gen weapons of mass destruction.

2a1) In one large scale project with a multitude of sub-projects they research the anatomy and neurology of the central, enteral and peripheral nervous systems with their coded bio-neuro active electro-magnetic fields in intentional misapplication of neurological technologies to manipulate the bio-chemical-electrical processes, determining spiritual, ethical, social, intellectual, motivational, emotional, sensual, motoric and sexual behavior.

2a2) Another large scale project researches structures and mechanisms of the human genome in intentional misapplication of mutagenic, hybridization and recombinant DNA technologies to cause with incisions into the genotype changes in the phenotype and shifts in the human gene pool. As goal has been set up the construction of the first 'biological bomb' for peace time employment of gene altering agents in graded to blanket mass poisoning of food and water supplies as well as mass target poisoning of people for control of individual psychological, physiological and genetic processes of home and foreign populations. Mass destruction of population groups and over regions is realized over the sum of all single catalogued, G-pellet prepared targets.

2b) Tests and evaluation

Test series on radiation guns and bio-chem-genetic toxins for a worth analysis are conducted in the laboratory and training area with modeling, simulation, war games and also for combat exposure in life tests to collect representative samples from a population at large at home and abroad.

Active warfare agents undergo a comprehensive military worth analysis according to present and desired performance standards in their bio-chemical-genetic components, production, safety precautions, handling, training, weapon concept, equipment, infra-structure, cover, costs, target vulnerability, operational engagement, mission accomplishment and plausible deniability.

2c) Employment

A worldwide system of labor camps serves as the basis of secret policy goals.

Camp guards are employed as spot, walk by, stalk, decoy and hit teams.

2c1) Surveillance camps: spies record for information control the data flow in its entirety worldwide.

2c2) Deception camps: multi media presents a Potemkin village.

2c3) Extermination camps: executioners eliminate more than one thousand people a year.

2c4) Gas chambers: hit teams spray with nerve gases thousands of people a year.

2c5) Radiation camps: hit teams cripple by wave-particle beams thousands of people a year.

2c6) Harassment camps: Intelligence trainees strike down on millions of people a year.

2c7) Sadism and sodomy camps: hit teams mass drug a billion of people a year.

2c8) Behavior manipulation camps: hit teams mass drug millions of people a year.

2c9) Subversion camps: agents commit gross human rights violations around the world.

2c10) Dissection camps: hit teams test new toxins on millions of people a year.

2c11) Genetic manipulation camps: hit teams test genetic toxins on millions of people a year.

2c12) Revenge camps: private, independent defence leagues duplicate the global camp system.

3) Some US/Client covered B-C-R-G operations 1945 - 1989

3a) Labor camp operations

A system of labor camps is operated globally and expanded continually, especially surveillance, deception, assassination, subversion, corruption and life tests for B-C-R-G weapon development.

3a1) By the late 50s, set up were high tech command centers like the Special Operational Command (SOC). They are located within security bases and supervise a satellite surveillance/communication system, the production lines of toxins, storage, deployment, agents and covered operations.

3a2) By the early 80s, security research and industry supported, systematic, area covering employment of non-genetic, electro-magnetic-bio-chem toxins manipulates the psychologic-social profiles of more than a hundred million people of all groups of society a year worldwide.

3a3) US military-intelligence stay behind forces in occupied territories of Germany after WW II have systematically targeted non-support of US war objectives - pro peace activists and groups.

3a4) The FBI, responsible for counter-intelligence, established under J. Edgar Hoover in the 50s with the Project Cointelpro (COUNTER INTELLIGENCE PROGRAM) surveillance, infiltration and disruption of activist groups and organizations, deemed to be government critical and possibly foreign influenced. To forestall mass movements of progressive groups as for civil rights, disarmament, environment and immigrants, they employ in the gist of the McCarty area (1950 - 54) psychological warfare and extralegal force like fabricated charges, false arrests, suicide blackmail, drugging and assassination.

3a5) The US, Britain and France conducted with their atmospheric nuclear test programs 1945 - 62 life tests for fall out studies until the LTBT (Limited Test Ban Treaty) from 1963.

3a6) France and Israel developed their nerve gas agents with test series on FLN and Palestinian freedom fighters, taken prisoners, - none survived and their ashes were scattered over the desert.

3b) The Manson family founded 1968 a hippy community near Los Angeles with up to 100 members. Out of racial ideology and CIA ties members were psychologically, physically and by drugs enslaved and programmed in their behavior up to the point to commit a series of murders in 1969.

3c) Major Assassinations

3c1) Marilyn Monroe died on Aug 5th 1962 by administered drugs by people close to J. F. Kennedy.

3c2) J. F. Kennedy was shot on Nov 22nd 1963 in Dallas TX to forestall an internal CIA clean up.

3c3) Dr. Martin Luther King was shot on Apr 4th 1968 in Memphis TN to break the civil rights movement.

3d) Coups d'état

3d1) The CIA/MI5 coup in Iran 1953 against Mohammad Mossaddegh reinstated the Shah.

3d2) The CIA/MI5 coup in Iraq 1963 against Abd al-Karim Qasim supported the Ba'ath Party.

3d3) The CIA coup in Chile 1973 against Salvador Allende set A. Pinochet with a military junta in power.

3e) Vietnam War 1955 - 75

3e1) US military-intelligence forces employed in detention and interrogation B-C-R weapons.

3e2) The chemical defoliation program from 1961 - 75 employed Agent Orange with noxious traces of dioxin from its manufacture at Dow Chemicals to cause dioxin poisoning of more than 4 million victims.

3e3) The Phoenix Program, succeeding similar efforts, was conceived by the White House in 1965, supported by the CIA, DoD and US Military Assistance Command Vietnam (MACV) with intelligence liaison officers, Green Beret and Navy Seal troops in operation. As a terror campaign against the civilian population it was to infiltrate and break the Viet Cong infra-structure of VC sympathizers. With over 30000 recruited informers it eliminated by democide over 1 500 people a month, over 40000 to the end of the war.

3f) Public investigations

In wake of the Vietnam War followed a series of news paper leaks and investigative commissions like the Church and Pike Committees (1975), giving evidence about illegal surveillance, torture, pseudo-medical experiments and assassination attempts of foreign heads of state by the CIA, FBI and NSA.

3g) Star Wars

The Strategic Defence Initiative (SDI) of 1983 was to set up an effective shield against intercontinental ballistic missiles by space based radiation weapons and anti-rocket rockets. In 2002 it was consolidated in the National Missile Defence Project.

4) Some overseas covered B-C-R-G operations from 1945 - 1989

4a) Russia

Russia developed its B-C-R-G weapon arsenal by its military and security services like the KGB, massively scaled up after WWII, with research and testing in the Gulag, in medical dissection chambers of their mental institutions and on populations at large. Their delivery systems, stockpiles and infrastructure match those of the NATO forces for overkill deterrence.

4b) Japan

About Japan's research and massive employment of B-C weapons during WW II no data are available.

4c) Out of the advances in modern bio-chemical sciences, which are comparable to the progresses in physics in the first half of the 20th century, the criminal intent of political-military secret policy goals and security laboratories has realized with B-C-R-G technologies, extending the radius of actions in space, time and nature, being man's vulnerable living conditions, new, devastating dangers to man. Threatened to come beyond economic exploitation are further planetary catastrophes with e.g. contamination of the human gene pool, devastation of natural land, uninhabitability of build land for hundreds of years and eradication of billions of people with the possible extinction of mankind.

5) Spreading awareness of B-C-R-G weapons from 1989 on

5a) End of the Cold War

In autumn of 1989 the Berlin Wall fell, the USSR broke up and reunification of Germany followed. The methods of the Cold War appeared to be 'justified'.

5b) Spreading awareness

5b1) In December 1989 the Bush I Administration (1989-93), the President, National Security Council and Justice Department gained detailed knowledge of some 'black projects' of B-C-R-G micro-weapons with their designed goals, research, testing, organization, employment and massive CIA/FBI human rights violations against entire population groups. In February 1990 the US Senate Intelligence Committee obtained a corresponding report.

5b2) Throughout government departments and the general public at home and abroad the knowledge about human rights violations of government, industry and private agencies' security personnel with the most advanced technologies started to spread slowly and usually point like. The new threats were mostly not fully realized, in cynicism belittled, with mock arguments diffused, in apparently safe distance bypassed or in bestiality exceeded, but mostly passed on by word of mouth, mail and electronic media like phone, fax and internet. Some private investigations determined by clinical tests some toxins, counter-toxins and therapies. Active operators, schreibtschätter and their tasks have been recorded in lists. Some results have been stored on private, digital data banks.

5b3) Spreading knowledge and politicization of covered B-C-R-G operations generated new political-military-intelligence-social-cultural forces around the world. Security and power ambitions stepwise duplicate, proliferate and intensify their employment to feed a spiral of hate and bestiality, a clandestine, global high tech war between all fractions and new emerging groups and a fornication race for predominance in the new miniaturized weapon architectures.

5b4) Only a diminishing minority fraction realizes the extreme vulnerability of human nature and the transgression of boundaries that will inevitably lead to planetary catastrophes. They appeal to the human spirit of the times to initiate the long winding procedures of the mills of justice to stop the killing by

- An information campaign about possible misuses of positions of power.
- An information campaign about the nature and consequences of B-C-R-G misuses.
- A public investigation into B-C-R-G misuses.
- A disarmament operation.
- Reestablishment of national constitutionality.
- Supplementation of international conventions.
- Empowering of national-international law enforcement.
- International supervision over positions of power.

6) US/Client reactions from 1989 - 2001

6a) Reactions by the Bush I and Clinton Administrations

6a1) The Bush I Administration, in line with hegemonic policies and a powerful lobby of the Security Community, continued on executive order R&D projects with bi-chem-gen toxins. US CIA, Military and NATO laboratories stepped up their research of recombinant DNA technologies with the goal to modernize the present state of the art of behavior programming by attacking causes and not only symptoms. Utilizing population genetics increases the efficiency with coverage of entire regions and population groups by stable, sustainable transferal of modelled genetic strains to succeeding generations and their economy by centralized supervision of a lean network of undercover agents.

6a2) Surveillance of groups, regarded as dissidents, was tightened. All security matters in public discussion are to be defused by plausible denial and then with all their fibers removed from public awareness. In March 1990, some in the Republican leadership pressed the Democrats to drop the matter and to hide CIA/FBI misuses to their full extent. The Office of the President contacted several national papers to intercede with publication of any CIA/FBI misuses.

6a3) After the election in November 1992, B. Clinton continued his predecessor's policy of total secrecy. In line fell M. Thatcher of Great Britain, F. Mitterand of France, H. Kohl of Germany and in late fall 1992 J. Mayor of Great Britain.

6a4) In January 1998 W. Renquist of the US Supreme Court took the part to suppress any legal evidence of undercover security operations within the US justice system.

6a5) The US District Court in Washington DC dismissed in September 1998 a lawsuit by the International Committee on Offensive Microwave Weapons (ICOMW), asking to enforce a presidential memorandum, which bans involuntary research on human subjects.

6a6) In March 1999 B. Clinton, having just survived impeachment procedures in Congress, declared publication of these crimes to be the world's No 1 terror threat. He started a billion dollar program to tighten up all major US institutions against counter-attacks and to insure their support.

6b) Reactions overseas

6b1) In May 1993 B. Jelzin of Russia condoned the Western Atomic Powers' policy of total secrecy. He employed B-C-R weapons by way of his own security services systematically under cover.

6b2) Early 1994 some of German industry reinforce BND nerve gas operations with industrial toxins.

6b3) In August 1994 the Government of Israel reaffirmed its support for Mossad operations, employing nerve gas and bio-chemical drugs.

6b4) In fall 1994 the Holy See in Rome yielded to extortion and bribery to drop opposition to human rights violations by the major powers' undercover operations.

6b5) In early 1996 the leaders of the Governments of the US, Great Britain, France, Germany and Russia reaffirmed their decision to contain the now spreading awareness of their massive human rights violations by any means, including assassination.

6b6) On 11 28 1996 the European Commission of Human Rights turned down a suit against CIA/BND mass nerve gas and drugging operations, violating the European Charter's Art 2,1 Right to Life, Art 3 Degrading Treatment, Art 5,1 Freedom and Security, Art 8,1 Privacy (Application No 33445/96).

6b7) In May 1997 T. Blair of Great Britain continued the policy of total secrecy.

6b8) Since then NATO military security employs measurement of brain wave patterns additionally area covering in their early warning system against security threats.

6b9) In May 1998 the Government of Japan pledged its support to the Western Atomic Powers to assist in the enforcement of total secrecy.

6b10) In July 1998 NATO military security services became broad based active to suppress the spreading awareness of micro-weapon operations.

6b11) In October 1998 on initiative of G. Schröder of Germany, predominant forces of German and US Industries reinforced total secrecy with their own security organizations.

6b12) Also in fall 1998 the Russian Military agreed to execute assassinations in contract.

6b13) In January 1999, the European Parliament passed resolution Eg A4-0005/99 EP, calling for disarmament of A-weapons, destruction of B-C stockpiles and an international convention to ban all weapons, which might enable any form of manipulation of human beings.

6b14) Dismissed were two law suits: Staatsanwaltschaft Bonn, 09 13 2000 (AZ 50 Js 898/00); European Court of Human Rights, Strasbourg 07 16 2002 (Application Nr. 6456/02).

7) Third World Coalition from 1989 - 2001

7a) Investigations

Some security agencies of the Third World conducted a closer investigation of US/Clients compact weapon architectures and their employment against dissidents and entire population groups. They increasingly counter-attacked US Military/CIA/FBI and German BND/AVS personnel to contain their massive nerve gas and drugging operations in the US and Europe and soon scaled them up against hostile agents worldwide.

7b) Coalition

The larger and the majority of smaller Third World Countries formed a coalition and initiated, supported by Russia, an in depth investigation of the intelligence agencies of the Western Atomic Powers and NATO, Japan, Germany, Israel and eg Saudi Arabia. Their goals branch out widely:

7b1) Information about the developmental status of B-C-R-G micro weapon systems.

7b2) Protection against threats from B-C-R-G micro weapons.

7b3) Predominance with global employment of B-C-R-G micro weapons.

7b4) Political-military-social counter-leverage against the Western Powers.

7b5) Suppression of any attempt towards publication of undercover operations.

7b6) Revenge for torture, murder and 500 years of dehumanizing treatment.

7b7) Indignation to lay waste depraved political-social leadership.

7c) Total secrecy

The Third World Countries retreated one by one from their initially pledged support for public, reliable international safeguards against misuses of modern B-C-R-G technologies to protect the dignity of man, right to life, basic freedoms and a community of nations, free of war. Suggested was the enactment of special legislation to ban the development, possession and use of devices, which can manipulate the human nervous system and of toxins, which can manipulate the human genome, excepting analogous to the abortion indication rule some medication and therapies with informed consent. Instead they caved in to the policy of total secrecy for undercover security operations.

8) Private Independent Defence Leagues from 1989 - 2001

8a) Victim associations

Several victim associations and self-help groups, calling themselves targeted individuals (TIs), organize themselves in alternate media, mostly the WorldWideWeb, conduct information campaigns about live tests of military and intelligence B-C-R research projects, writing to eg government offices, legislatures, the press, medical associations, handing in petitions and law suits at the responsible government offices for violations of rights to life and liberty by deliberate assault on non-combatants. There they are altogether ignored, turned down, put under surveillance, infiltrated, instrumentalized as false fronts and neutralized in labor camps. They are hardly supported by established caritas organizations.

8b) Defence leagues

Several mostly smaller parties sprang up out of individual security concerns, organize themselves for collective protection as independent defence leagues and are, driven by spreading awareness of micro weapon operations, continuously multiplying beyond several thousand groups worldwide. They investigate parallel to the Third World Countries the security-intelligence services first of their local region, then successively of their home country, neighboring states and the Predominant Powers. Their operational interests unfold like those of the Third World Countries into information, protection, predominance, counter-leverage, total secrecy, revenge and indignation. They arm themselves with surveillance/communication systems, stolen equipment, plundered stockpiles, copied operational know-how and recruit their own undercover hit teams.

8c) Total secrecy

Most defence leagues pretend to clean up the misuses of modern B-C-R technologies and to protect the general population. But only a dwindling minority holds on to a public investigation, prosecution and legal safeguarding measures to fend off the otherwise self-destructive escalation.

9) Escalation after 9/11

9a) Hate and violence

9a1) The Global Powers, most Third World Countries and Private Independent Defence Leagues rely blindly for their personal and collective security on gapless information control, electronic shielding and deterrence by bestial retaliation. But the apparently calm political surface of image fascism with pretended ethical political-social standards can only be maintained by all round escalating repressions, which chase themselves in excesses of hate and violence.

9a2) They act out of lower power instinct, the most devastating archaic notion, narrow, vile, hateful, persistent, clinching, scheming, instrumentalizing in despotic perversion social values, structures and processes.

9a3) Private individuals are left standing without legal defence against arbitrary assassination, nerve gas attack, toxic drug attack, radiation attack or any illegal listening or video device. In labor camps millions of people are being manipulated out of their lives each year.

9a4) None of the professional political-social-cultural decision making elites has the inner strength to roll back its clandestine surveillance and security operations, covering their career goals efficiently, quietly and above all comfortably. - The dignity of man with the universal values of life, truth, unity and equality of all people has been terrorized to death by privileged political-social-scientific knowledge, technologies and their employment as tools of power.

9b) Crime

Worldwide spreading awareness of clandestine operations with B-C-R-G micro weapons without being subject to legal prosecution has opened up opportunities for illegal activities across the board. Information skimming has become an integrate technical part of organized crime. The issues of micro weapons, protection, control, extortion and revenge have been passed around through underground milieus.

9c) Terror

Worldwide spreading awareness of clandestine operations with B-C-R-G micro weapons, the Western Atomic Powers' open and covered hegemonic policies, their despotic perversion with massive torture also against population groups at large induced an increasing series of terrorist attacks by militant groups mostly against soft targets of the US and their Allies, eg:

Jul 1996 Lockerbee

Aug 1998 Kenia

Sep 1998 Kairo

Sep 2003 Beslan

Nov 2003 Istanbul

Mar 2004 Madrid

Apr 2004 Saudi Arabia

The series of terrorist attacks continues unabatedly. Increasing are sex killings and offences, amok runs, suicide bombings and unexplained deaths like of J. Möllemann in 2003.

9d) 9/11

On September 11th 2001 the Twin Towers in NYC and the Pentagon in Washington DC were attacked by al-Qaida terrorists, hijacking civilian passenger jets on routine flights to steer them into the buildings.

The attack was intentionally allowed to proceed by the Bush II Administration's Security Planning Group as a fabricated political event to extend belligerent global hegemonic policies beyond the Cold War into a war against terrorists and their possession of weapons of mass destruction.

9e) Escalation by US/Clients

9e1) The Bush II Administration (2001 - 2005) together with its Allies and NATO declared war on international terrorism and terrorists' control over weapons of mass destruction. In Congress the US Patriot Act passed on 10. 25. 2001, which was followed by the US Freedom Act on 07. 01. 2015, empowering the investigative authorities with more rights at the expense of civil liberties. The intelligence, military and administrative anti-terror forces were restructured. To fortify its 'limes' against imports of instabilities, civil strife, war and terrorism and to eradicate the al-Qaida terrorist network, it forged a global political alliance with UN mandate and led by US military forces invaded in Nov 2001 Afghanistan, defeating the Taliban regime. To topple S. Hussein's murderous dictatorship, US troops, without a UN mandate, but with support of Great Britain, Turkey, Spain and Poland, invaded in March 2003 Iraq, throwing the country into civil war with daily casualties by Iraqi resistance forces and partisan groups.

9e2) The Bush II & III Administrations (2001 - 2009) and their Allies boosted the propaganda against international terrorism, its ideologies, dangers and underground activities. Addressed was mostly the lowest emotional level with the motto: 'Patriotic crimes in defence of liberty are no vice'.

9e3) They tightened up again on total information control. Their undercover hit teams improved infiltration, slander, corruption, sabotage and assassination techniques; international co-operation with allied security organizations; shielding of government, public and private institutions and corporations against counter-attacks; recruitment of undercover staff by observation, corruption, extortion and incorporation into a network to instrumentalize all vital areas of society from the churches, charities, arts, medical associations, economic-financial institutions to the courts and set up a multitude of farmed out, mission responsible but formally independent identification, surveillance, stalk and hit teams under pretense to clean up clandestine terror operations. Peaceful protests are crashed with sodomitic bestiality, as Kanzler G. Schröder of Germany operated SS like nerve gas and poison pellet hit team to guard his office grounds.

9e4) Military-intelligence-private R&D efforts press ahead with the project of a 'human hand directed evolution' to transform man as a product of natural evolution into a cloned cyborg-chimera with augmented capabilities by programmable electro-magnetic-mechanical and bio-chemical-genetic means.

9e5) Developed are N-weapons

- Weapon development utilizes nano-sciences and -technologies in mechano-syntheses to enhance analytics, solid, liquid, gas and plasma materials, miniaturization, performance, safety and handling.
- It utilizes nano-machines as programmable nano-robots, placed in body tissue, to manipulate their anatomy, morphology, physiology and environment and with it the level of functional capabilities.

9e6) In 2001, 2002 and 2005 Congressman D. J. Kucinich introduced the Space Preservation Act, prohibiting the stationing of weapons in space, which was referred to the House Science, Armed Services and International Affairs Committees, but no further action ensued. Weapons listed were:

- electronic, psychotronic, or information weapons
- chemtrails
- high altitude ultra low frequency weapon systems
- plasma, electromagnetic, sonic, or ultrasonic weapons
- laser weapon systems
- strategic, theater, tactical, or extraterrestrial weapons
- chemical, biological, environmental, climate, or tectonic weapons

9e7) In 2002, the International Committee of the Red Cross raised the issue of Directed Energy Weapons at the Geneva Forum, also 2009 at the 5th European Symposium on Non-Lethal Weapons and again at its European Conference.

9e8) Since 2006, whistleblower J. Assange publicizes via WikiLeaks hacked government documents, pointing to violations of law.

9e9) In May and August 2011 the group Individuals Tending to Savagery (ITS) committed attacks against scientists at the Instituto Politécnico Nacional and Instituto Tecnológico y de Estudios Superiores de Monterrey to block nano-research with its uncontrolled dangers for life on earth.

9e10) In 2012, the EU received as long term zone of peace, stability, tolerance and prosperity the Nobel Peace Prize.

9e11) Since 2013 whistleblower E. Snowden publicizes via press leaks internal NSA documents, outlining its global surveillance activities.

9f) Escalation by Third World Governments

9f1) The governments of the Third World Countries continue their investigations into the major powers' and clients' military and intelligence activities and widen them out to screen all their political-social forces, decision making elites, public and secret policy goals, social structures and processes, resources, government and private security personnel and area covering single households. They penetrated electronically most political-military-intelligence high security areas and often leaked show off successes into open channels.

9f2) At home they screened all foreign past and present intelligence activities in all areas of their countries' life from covered operations to environmental damages. They rolled back and protected themselves against further foreign subversion and corruption, also cutting off the fuel for up to then hardly heeded fornication as cultural and economic weapon, degrading social fabrics by internally bleeding wounds.

9f3) Their own political intentions remain spread out widely: information, protection, predominance, counter-leverage, total secrecy, revenge and indignation.

In first line they suppress any attempt towards publication of their B-C-R-G undercover operations to forestall action by the public authorities against misuses of positions of power.

At the same time, indignation gains more weight, as their in depth investigations reveal within the industrialized nations a social fabric without credibility, as image fascism by total information control drowned basic values of life and especially truth in its generation, management and leadership role.

9f4) They expand their global undercover micro-weapon operations.

- They formally tolerate foreign hostile secret policy goals, financing, R&D activities, infra-structure, deployment and undercover operations.
- They expand their own military-intelligence infra-structure, often drawing on scientific, technical and logistic support from Russia.
- They expand their own global system of labor camps with a network of affiliated groups, undercover agents and hit teams.
- They keep a close watch for early warning and shielding on hostile security services and the global information flow in its entirety.
- They incapacitate foreign communication systems, equipment, toxin stockpiles and delivery systems.
- They have pumped up with depot poison pellets all political, military and civic leaderships in the Western Industrialized Nations, especially the personnel of their security organizations and most of the Private, Independent Defence Leagues to neutralize them as security threats. Equally targeted are any hostile person or group or fraction of a population.
- Targets are hit in stages to soften them up, to reduce them below the threshold to fight back, to impair their ability to work and to enslave them physically and psychologically.
- As the B. Clinton White House sex affairs in 1997-99 had been induced by sodomy drugs, former and present Heads of State like G. Bush Senior and Junior, B. Obama, G. Schröder and A. Merkel are being sodomized regularly, who in a public position have no choice but to hit back.
- In all, their undercover efforts strive for predominance in B-C-R-G micro-weapons and allow multiple new dangers for mankind to be unleashed.

9g) Escalation by Private, Independent Defence Leagues

9g1) The private, independent defence leagues also continue their investigations into the major powers' military and intelligence activities and widen them out to cover all households, work places, assembly halls and electronic equipment of their local area, region, country and neighboring states.

9g2) They recruit themselves mostly via underground channels out of various population groups:

- Close to crime, to secure their illegal operations.
- Close to surveillance/communication systems, following undercover operations.
- Close to security systems, following advanced security technologies.
- Victims, their relatives and friends, to defend and revenge themselves.
- Threatened citizens, to defend themselves out of private security concerns.
- Upset citizens, to vent their indignation over depraved political-social leadership.
- Cynical citizens, to profiteer from private security concerns.
- False flag groups, to make victims illusionary hopes.
- Engaged citizens, who want to stop the killing.

9g3) They are growing beyond several thousand groups worldwide, ally and organize themselves in global networks, farm out operative tasks, go for deeper cover in far away places to erase tracks and draw under pretense of security all professional fields, societal institutions and the entire population into complicit, sodomitic roped parties. Undercover operations have multiplied themselves into a peoples' movement and become with their excesses, security circus, costs and dangers in a highly technological environment a political-social topic in all circles of society.

9g4) In first line they suppress any attempt towards publication of their B-C-R-G undercover operations to forestall action by the public authorities against clandestine acts of terrorism.

9g5) They expand their global undercover micro-weapon operations.

- They do not exercise constitutional oversight over positions of power according to law by the people, but tolerate their secret policy goals and enforcement concepts.
- They set up their own command centers, surveillance/communication systems, steal equipment, plunder stockpiles, copy operational know-how and recruit their own undercover hit teams.
- They keep a close watch for early warning and shielding on hostile security services and the global information flow in its entirety.
- They hypocritically pretend to clean up the misuses of modern bio-technologies, however
They lie about life and creation, procreation and causes of procreation, death and causes of death, constitutionality and human rights, faith, reason, maturity and ethics.
They do not provide any political education to the general public.
They do not hang up a single poster to inform and warn the general public.
They do not help a single victim with a doctor or lawyer.
- They attack often in collaboration with government agencies any hostile person or group.
- They strive for breakthroughs in fornication, eg their executioners way lay in first line advocates of publication, prosecution and public trial of the perpetrators according to penal law to sodomize them to death, first shooting in bio-chem-gen-electro-magnetic-thermal-acoustic micro-chip sensors and radio emitters, then pumping in depot poison pellets, then crippling their inner freedoms of thought and movement, last breaking their physical strength, all under the perversity label of direct help with medication or emergency medical care for the victims.
- In all, their undercover efforts strive for predominance in B-C-R-G micro-weapons and allow multiple new dangers for mankind to be unleashed.

10) Global clandestine, dirty B-C-R-G war from 2001 on

10a) Dirty War

The Predominant Powers and their Allies, the Third World Countries and the Private, Independent Defence Leagues act out of lower power instinct. Out of one negative motive, misuse of power, they have escalated mass human rights violations with B-C-R-G compact weapon systems in all areas of life along the states of investigation, subversion, corruption, fornication, stirring up of hate and incitement to bestialities under cover of image fascism, preserving a calm political-social surface, into a global clandestine, dirty war, fraction against fraction, interlocked in a fornication race for 1st place.

They are terrorist organizations according to §129a StGB (German Penal Code). They are like special governmental detachments illegal combatants, who are violating martial law and are not protected by the Geneva Conventions of International Law of the Community of Nations.

10b) Major historic forces

Justification of hegemonic policies by an ideology of competing social systems and instigated terrorism gives evidence of incomprehension of God and responsibility, nature and reason, man and maturity, society and ethics. Perversion of all God given institutions are crimes against humanity and the creation itself.

Since the last four decades of the preceding century, subversion, corruption, fornication and mass murder with modern technologies, leading inevitably to collapse of political-social systems, planetary catastrophes and self-extinction of mankind, have become the predominant forces of present day history.

10c) Constitutionality

10c1) Constitutionality serves as essential, aspirational red thread for the long term future of man.

Based on human dignity, all universal framework and object values branch out from it.

Its scaled up intent is to expand sound theology's, maturity's, reason's and ethic's freedoms.

Research and development have enlarged knowledge and the thinkable, calculable, do and useable.

Cosmic emancipation and responsibility aims at the long term survival of mankind in the universe.

10c2) Ethics' task is to solve cases of gross corruption with disastrous consequences, that not a major crime or misdevelopment runs to its self-destructive end.

Methods are problem-conflict solving by language, enlightenment, laws and supervision.

They overcome with spiritual-political-social will any hostile, inhibiting factor.

10c3) It is the right of the people to reverse a clandestine or open constitutional revolution and to correct misdevelopments, leading to planetary catastrophes and to institute a new government with the principle of constitutionality to draw power out of political-social life and to establish an integer, independent legal institution with power monopoly, as the dirty B-C-R-G war will only come to a halt, when each single person can realize his right to personal integrity publicly in court.
