

Majdanek - Belzec 06 12 2001

May man keep a watchful eye
that these crimes against humanity
will never reoccur again.

The executioners in the extermination camps and labor camps of sadism and sodomy eliminate in first priority advocates of publication and prosecution of the crimes of clandestine high tech terror to prevent the formation of any organization, advocating establishment of public, reliable safeguards against the misuses of modern bio-technologies.

Several larger parties, security services and defence leagues, having escalated the investigation into the security agencies of the Western Atomic Powers and NATO, of Russia, Japan, Germany, Israel, Saudi Arabia and of larger Third World Countries into a global dirty war, today multiplied to several hundreds of groups, operate the largest system of labor camps in the whole world.

They operate the most heinous extermination camps in the history of mankind, executioners sodomizing to death thousands of people a year.

They operate medical dissection camps, hit teams conducting field testing of new classes of toxins on tens of thousands of people a year.

They operate the largest labor camps of sadism and sodomy worldwide, executioners mass drugging tens of millions of people a year.

They operate CIA gas chambers, hit teams spraying thousands of people a year with concentrated nerve gases and industrial toxic gases.

They operate the largest labor camps of behavior manipulation and enslavement worldwide, hit teams mass drugging tens of thousands of people a year.

They operate the largest labor camps of deception and perfidy worldwide, recording in 'total information control' tens of billions of videos, e-mails, faxes, conversations, brain wave patterns and genetic fingerprints a day.

They operate labor camps of subversion and corruption, promoting massive, clandestine human rights violations around the world.

Propagating the total lie, in the name of humanity suppressed is the publication of the unleashing of the multiple, uncontrolled dangers of the extinction of mankind.

Political image fascism, relying on manipulation of a population by clandestine, technological means, kept bare of convictions, ethics, reason or real life experience, has adopted the secret policy goal of 'total information control' with a gapless early warning system against security threats. Suppressed are in first priority any arising attempts towards publication of the employment of illegal listening devices or of a target's medical or legal evidence (Staatsanwaltschaft Bonn from 09 13 00: AZ 50 Js 898/00). As facades, as skin of the power skeleton, held up are public images like a constitutional framework. Image fascism, practiced by dominant forces of the church, the sciences, industry, the press, the arts, advances scientific, economic and social illusions like of ever accelerating progress. Topped in deception, pretended are hypocritical, ethical standards. In abandonment of faith, conviction or Spirit of Man it lacks the capacity to fill any endeavor with real substance. It has lost its human basis. A void in a void it alternates between the poles of life style illusions and bestiality.

Despotic perversion, relying on national strength through military power, economic vitality, competitiveness in global markets, technological superiority by progressive R&D programs, the bare skeleton of power, has adopted the secret policy goal of total control of all political processes by clandestine, rational means. It channels political-psychological profiles of a population in a state of the art program of depot pellet - toxin release, manipulating individual neurological processes. It employs population genetics as a 'scientific' tool to model a population's allele composition by political, military, economic, sociological, demographic criteria, manipulating by mutagenic, hybridization and recombinant DNA technologies individual genetic processes. Applying to crime the most advanced technology, it advances its bestial ambitions, to be recognized as a statesman in the progress of the times, in depraved reasoning, arguing out of hate of other people, out of inversion of mind and out of perfidy against the dignity of man.

The numerous defence leagues cover their tools of clandestine high tech terror and gross mis-application of modern bio-technologies in blasphemy of truth:

They pretend a community of nations free of the scourges of war in recognition of human rights, equality of all nations, races, religions, the sexes, - They lie about it.

They conduct a dirty war of global dimensions against the personnel of competing government security agencies and private defence leagues, especially a nerve gas and poison pellet war against the BND on German soil.

They pretend a community of nations living in peace, freedom, self-determination, development of culture and rising standards of living in all countries. - They lie about it.

They secure the know how of bio-technological R&D programs of the major powers' security agencies, plunder their toxic drug stockpiles and employ them with any new, experimental drug massively and randomly against populations at large.

They pretend national democratic constitutions with principles of representation, solidarity, separation of powers, parliamentary oversight functions. - They lie about it.

They undermine and pervert every constitutional institution, civic organization, control function and social responsibility as the areas of creativity, knowledge, technology, institutional organization and private property.

They pretend national democratic constitutions, enforcement of basic liberties with right to life, health, privacy, free assembly and choice of profession. - They lie about it.

They attack above all their targets' health and inner freedoms of thought and movement for their development, identity, character to be stripped to collapse.

They pretend codification of inviolability of human genetic codes and establishment of reliable safeguards against misuses of modern bio-technologies. - They lie about it.

They violate statutes of crime of omission, formation of a terrorist organization, incitement to a crime and of the people, glorification of violence.

They pretend worldwide establishment of forensic laboratories and medical facilities to provide adequate medical treatment for the victims of misuses. - They lie about it.

Their schreibtschätter as self-appointed extermination camp doctors pick the toxins and record results under the perversity label of emergency medical care.

They pretend criminal prosecution with public indictment according to the panel code. - They lie about it.

Their schreibtschätter as self-appointed district attorneys select their targets from competing government security agencies, private defence leagues and populations at large by arbitrary choice.

They pretend conviction and sentencing of all offenders within the public court system. - They lie about it.

Their schreibtschätter as self-appointed judges place their targets unrecorded, clandestinely into a spot in their system of labor camps.

They pretend execution of sentences with securement of offenders within the panel system. - They lie about it.

Their executioners, fornication their sole purpose, release the toxins from anonymously shot in depot poison pellets to sodomize their targets to death by full consciousness and in psychological terror.

The defence leagues, not having publicized the employment of clandestine high tech terror in its beginnings, a breeding ground for the seeds of image fascism and despotic perversion, in consequence, in a creeping process through the stages of subversion, corruption, fornication, proliferation, escalation have fostered crimes against mankind to shoot into gigantic proportions. They amplified each stage by stirring up of hate as incitement to commit any excess of sodomitic bestiality conceivable. Suffocated in depravity are all human standards, the integrity of truth and life as common ground for dignity of man and universal principles of unity and equality of all mankind, destroyed are democratic constitutions and civilization worldwide. In the outgoing decade of the last century, corruption, fornication and extinction of mankind have become the predominant forces of history.

You shall love your enemies,
but also speak the truth.

The cosmos with its four physical forces, space and time dimensions, appearances from plasma to solid, interrelations from chaos to functional dependencies and its possibility to form a vast number of chemical compounds, forms out single units of matter and fields of forces with consistent identities, characteristics, relations, to render itself to an intelligent observer qualitatively and quantitatively depictable, obeying the correspondence principle of an one to one relation between fact and term. The physical cosmos yields in first place exactness, a standard of truth.

The human intellect has developed out of evolutionary forces over successive generations with an universal genetic code, genetic variability, specialization of functions, adoption; natural selection, forming out a multifarious plant and animal life on earth. The human mind is tied to life in cosmic time and location, planetary chemical composition, environmental conditions and physiological functionality. The physical and bio-chemical dependencies render acceptance and support of its base a precondition of the human mind. The foundations of life yield in second place self-preservation, the tasks to amend and serve, a standard of truth.

The primary function of the human intellect is cognition. It concentrates its efforts in freedom of thought and movement to arrive at true statements in form of commentary, explanation, interpretation, criticism, foremost to give an accurate description of the thing at hand, an item of the area of objects of nature, of the area of human concerns or of spiritual dimension. The areas are tied together by the correspondence principle of comprehensiveness to preserve an equivalent balance between them, and the different investigative fields or research are tied together by the correspondence principle of method, to exhaust all available tools in breadth and depth to gain an objective result. It is motivated out of self-preservation and out of curiosity into the furthest rational extending areas with ensuing consequences, the rims of the mental horizon, the limits of cognition.

The human mind strives to expand. It moves with freedom within the limits of cognition, mostly by ways of deliberate observation, experience and reasoning. It exercises outer freedoms, by differentiation of physiological functions, of movement, action, various ways of conduct, limited by physical forces of nature, counteraction, legitimate rights, requirements of cooperation in human relationships, and inner freedoms, by differentiation of neurological functions, with its faculties of intention and conception, operations of description and comparison, composite operations of reflection, decision, various ways of expression and their development, balance, identity. These boundaries can be transgressed as for example limits of cognition are expanded in the area of natural sciences by research efforts to achieve closer approximations to structures of reality. They are enlarged by inches, however not to be exiled altogether.

How far can the human mind expand? The common questions are:

How is the infinite to be described? – How is an infinite cosmos?

How is man's natural environment to be visualized?

How does man understand himself?

What are the relations between the infinite, the environment and man?

The basic question is: what freedoms for truth and life does the position of man in relation to the infinite and his environment open up?

Man cannot create of his own physical energy, matter, dimensions, forces or laws of nature. He cannot create global environmental conditions, alternate chemical building blocks of life, proteins, fats, carbohydrates or codes of biological growth, differentiation, specialization of functions. – Not power of creation, an archaic notion, but the Spirit of Man unfolds new capabilities. It lays out human concepts on base of universal expressions of truth, human dignity, unity and equality of all mankind, in all dimensions of the mind, the spiritual, intellectual, emotional and ethical, conceding individual spaces of thought, movement, expression.

Pursuit of truth leads to conviction and faith. Acting out of conviction, an affirmation of an human concept, man states his self-understanding in relation to the infinite and nature, delineates ambitions and conceptions in self-description, sets renewed points of motivation, reviews them in reflection, ascertains and defends his human base. 'Human life', his endeavors, develop out of the intellect, refuting his decisions to be penetrated by other chains of causalities. Aware of competing paths, in free choice of subject matter, he advances one aspect of truth as in education or serves one aspect of life as in health care and establishes inter-connected mechanisms of accountability. Matter and flora serve as sparse raw materials of expression, human health, more restricted, merely as a basis of existence. Human health is not a manipulable parameter of the human mind in any of its dimensions to gain a higher level from physical- biological dependencies.

What can man rationally expect after death? Immature question to ask. – Spiritual questions of man before God can only be answered from faith. They are given according to christian theology by His Word through divine revelation, summarized in the Nicene and Apostolic Confessions of Faith. God, the creator of all things, is truth and love. Man, in His likeness, though by one step qualitatively above physical-biological conditions, remains in an illimitable distance to God. A believer is promised through faith, he will find in resurrection after judgement a home in the Eternal Garden of God. The task of religion, to lead people closer to God, calls for raising standards of humility. The treasures of His Word are to be developed in self-criticism, support of neighbors is to reach foremost the poor and oppressed, oneself is to adopt one of the many values like unity, justice, education.

Spiritual life grants the freedom of peace, generosity and abundance to love one's enemies unreserved. A gain of cognition, truth, a comprehensive analysis towards innocence, pursues all questions in their dimensions, aspects and possible consequences, benefits as well as worst case. The institution of confession trains reflection, unprejudiced to review basic suppositions to sharpen position, focus, method and motivation of cognition. Truth is being regenerated, as it exists only in search of, in public and in fearless promotion.

Major forms of distortion of truth are: stratagems of deception, intentional substitution, false reasoning or interpretation, veiling; stratagems of elimination, intentional suppression, deflection, omission; stratagems of appeasing, often tendencies of intellectual sloth, false justification, ramification, diminution. The intensities of distortion range from ideologization, systematization, instrumentalization, propaganda, subversion, clandestine action, denial, defusing of issue. These techniques are applied commonly by usurpers in combination with coercion to hold up a 'legitimate' image of their despotic policies, manipulating the press and institutional control functions. They attack mainly tenets of faith or conviction, sound judgement, social responsibilities.

The major issues of justice and peace today are worldwide inequities of wealth, overpopulation, environmental destruction, depletion of resources, clandestine high tech terror. Unrestricted and probing pursuit of truth and to advance a solution to moral failures are not derived out of philosophy. It has abrogated its critical voice, having lost the metaphysical dimension, discarded the claims to wisdom, justice, enlightenment, humanitarian issues, to universal or object centered competence, denying responsibility for depraved ideologizations, which for example fueled the genocide during WW II or the post war arms race. The remnant of philosophy, pursuit of knowledge, leads to materialism. It denies the spiritual dimension, it explains all elements of reality within a single logical space, reduces multifarious mental processes to empirical, physical-biological interactions, systematized in a scientific worldview, feeding the technological civilization with archaic notions from prestige and power to illusions of human capabilities. The trend is demonstrated by the press, the forth power to exercise watchdog functions. – Adequate solutions to the major problems of our times, to effectively contain disastrous consequences, including the extinction of mankind, can only be derived out of ethics in an environment of politically self-cleaning forces.

The four eckpunkte of man's inner freedoms, the emotional one being left open, are 1) sound theology, 2) reason's freedom, 3) maturity's freedom, 4) ethical freedom.

1) Spiritual leadership commits itself to spiritually self-cleaning forces to give an example of His Spirit, refrain from violence, restriction to major issues, reestablishment of standards of truth. What freedom does sound theology open up? – Freedom from idolatry.

2) Categories of reason are applied by the mental operations, space, time, quality, quantity, causality, inter-relationship with conditionality and hypothesis, consequence, conglomeration. They act as boundaries between nature and man's sphere of human concerns. What freedom does reason open up? – Freedom from superstition.

3) Man stands alone. He develops his own concepts for thoughts and actions. Man is abstract, complex, active, regenerating, objectgerecht, reflective, accountable, represented by singular works of expression. Real life experience respects freedoms and boundaries, expressed better negatively as self-restraint of individuality. What freedom does maturity open up? – Freedom from illusions.

4) Ethics, the question, are all aspects and consequences of the thing at hand considered, directs its appeal at the conscience of the times. It educates about human inter-relationships, pursues comprehensive investigations with scientific dependencies, identifies a crime, sets an ethical sentence, restates universal principles to elevate public awareness by one step of human actions with devastating consequences. What freedom does ethics open up? – Freedom from gross criminal corruption. Its practical task is to solve historic cases of corruption.

Politically self-cleaning forces with an investigative spirit preserve man's capabilities of cognition in respect of truth and capabilities of intellectual life in respect to health in wholeness of the individual, balanced in spiritual, intellectual, emotional and ethical dimensions. They expand freedoms, first by standing on guard for ethical freedom with critical awareness of individual, multiplying 4a) social, 4b) political, 4c) historical processes. In probing pursuit, description, analysis, arrested are excesses of moral failures. Growing out of observant grassroots mentality, they pool the resources to publicly address any hidden depravity.

4a) The functional society in a pluralism of groups, realizing its multifarious efforts in division of labor, in a free market, independently, economically, interchangeably, establishes government institutions by the narrow guidelines of self-organization, minimal rationality, ethical corrective, linked by accountability.

4b1) – institutions: The structural and functional constitutional institutions as normative framework are codified strictly by the principles of public service, arbitration of conflicts, separation of functions, control mechanisms. Siphoning power out of constituting institutions, the snakehead of open and clandestine constitutional revolutions, legitimation of power by the people denied, is substituted by regulation specific proof of a public need in common welfare, comparably the social contract dismantled, is supplanted by the demand of internal and external non-discrimination. Oversight over public institutions of arbitration with human rights enforcement, as they have grown out of the French revolution, is to be layered basis carrying and to be augmented on the international scale, chartered independent, task-specific, lean to be effective.

4b2) – methods: Present in public through adequate, swift and decisive tools, methods adhere to refrain from violence, restriction to non-power methods, raising standards of truth. Immediate institutions supporting the victims serve a reconciliation with society, establishment of reliable safeguards and social justice.

4c) Kritik ist die Gesundheit des Individuums. Today, responsibility towards the zeitgeist captures man's functional capabilities, the rapidly growing areas of creativity, knowledge, technology, larger organizational structures. Demanded are investigative oversight functions over institutions with political, military, scientific, technological, economic, organizational, environmental, public media and lobbying power. In analogy to common obligations of private property, codified law is to demand for example in the area of technology impact statements of research projects and applications, public, reliable safeguards against misapplications, suppression of depraved research efforts. What freedom do political self-cleaning forces open up? – Freedom from grossly corrupted political opinions.
